PROFESSIONAL PROFILE

Jr. Java Full Stack Developer and Industrial Designer with expertise in Python, Java, JavaScript, HTML, and CSS, and experience using tools such as VS Code, IntelliJ, Figma, GitHub, and Illustrator. My multidisciplinary background has allowed me to develop a combination of technical and design skills, along with attention to detail, adaptability, teamwork, and problem-solving abilities. I seek to apply these design capabilities to software development to create functional, user-focused solutions.

TECHNICAL SKILLS

Python | Java | JavaScript | HTML 5 | CSS | Bootstrap | Spring Boot | MySQL | VS Code | IntelliJ | Figma | Procreate | GitHub | Jira SCRUM | Illustrator | 3D modelling

SOFT SKILLS

Adaptability | Team work | Creativity | Future oriented thinking | Attention to detail | Self-learning | Problem solving

ACADEMIC PROYECT

Software Developer | E-commerce for a pastry shop (August-2026)

- As a part of a team I developed an e-commerce platform for a pastry shop, using the SCRUM methodology and GitHub for version control.
- I used JavaScript for the page's functionalities.
- Using Figma, I created design proposals for the pages, considering typography combinations and color palettes that matched the visual identity of the pastry shop.
- I used HTML and CSS to give the pages layout and visual aesthetics based on the chosen proposal.
- I created some digital illustrations to complement the E-commerce design.
- I used MySQL for the user, admininstrator and the products data.

WORK EXPERIENCE

Industrial Designer | Ballhausen Engineering (October-2021 to July-2022)

- I created 3D modeling designs, renders, and plans for electronic product enclosures.
- I materialized the case designs using 3D printing, in order to physically preview the product and, if necessary, make the relevant changes before taking it to a final stage, which requires considerable communication with the client.
- I designed the enclosures by evaluating project requirements and communicating with other areas of the company.
- I made exploded views, assembly drawings and views with their respective measurements and details to preserve the design information.
- I gave project progress presentations to clients using renders, plans and 3D prints.

Freelance Industrial Designer | GRANDSTAND (October-2022 to June-2026)

- I created digital plans of structures for bleachers, with different views and perspectives so that the client could easily preview them.
- I created visual instructions based on the 3D modeled parts I created for the client.
- I designed and manufactured furniture, first modeling it in 3D to determine measurements, distribution of elements, quantity of material and costs.

EDUCATION

- **Bootcamp Generation Mexico |** Jr. Full Stack Java Developer Intensive Program (July-2026 to October-2026)
- **Bachelor’s Degree in Industrial Design (Title in process) |** Aautonomous Metropolitan University Azcapotzalco (May-2016 to June-2021)

COURSES

- **Java |** Learning to Earning (July-2026)
- **Front End |** Sololearn (September-2026)

LANGUAGES

- **English |** B2 Intermediate
- **German |** A1 Basic
